First name: donald

Last name: kkefferis

Organization:

Title:

Comments: As it takes roughly 400 years for an Old Growth forest to reach even the early stages of maturity, when we destroy one then it is irrevocably gone, for all intents and purposes, and along with it the services it rendered.

We cut them down at our peril.

Every last one still standing must be preserved as if they're a Rembrandt or a Picasso.
