Title:

Comments: County rd 56 (Lost Park Road) has become a major location for uncontrolled target shooting of all types of guns including semi automatic and at times fully automatic weapons. The Colorado trail parallels the road within a quarter to one-half mile in many locations. The dispersed camping near the Rock Creek wilderness trail is also a location that closely brings hikers and target shooting enthusiast close together. Target shooters often don't realize there is private property close to where they choose to target shoot. Areas of high public use and areas close to private land should be closed to uncontrolled target shooting.
