Comments: DO NOT SUPPORT LAND BUYOUT

If the non-federal land inside BWCA are to transferred to the federal government the children and local communities loose. The acres loss should be traded for equal value of land out the BWCA that is currently federal land. Keeping more public land within local governments will have a much more benefit to local area, than loosing more land to the federal government.

This is a one time payment into the school trust fund is shorting future children. By doing a land swap that land will generate income for the school trust fund for generations of children to come. Bonus for the land swap is more acres that will stay open to the public for multiple-use, not the single use like the current BWCA.
