Comments: I think the addition of a new lift will improve access to the trails but also cut down on emissions caused by the current lift engine and reduce noise pollution in the surrounding area. The addition of bike trails will give the opportunity for people to explore and appreciate nature in the warmer months and create a positive financial impact for Dayton. Lastly, adding lodging near the ski slope with help reduce winter congestion and improve safety on the access road. I think the resort is long overdue for these improvements. I applaud the effort.
