Comments: I am writing in support of Alternative 3 - with amendments

I believe that alternative 3 offers the strongest protection for ancient forests. However, the rule should have measurable, enforceable standards that end all old-growth logging, thinning, and burning on the national forests. Logging, thinning and prescribed burning should not be allowed "non-commercially" under the guise of habitat restoration

There should be a moratorium on logging any forest landscapes over 80 years of age and setting science-based old-growth targets for each forest would ensure old-growth protection and recruitment nation-wide.
