Comments: Lack of management is destroying old growth. Trees do not live forever even old growth should be logged and replanted at some point. The forest is sick. We are spending billions fighting fires when we should be making money where I live was the center of old growth spotted owl wars. The old growth is gone by fire. Standing left to rot. not replanted. My kids, their kids, and their kids will not see it in trees again. So sad. Campgrounds are gone recreation is gone. And spotted owl habitat is gone. Forest management is a complete joke
