Comments: I urge you to reject the Rattail Vegetation Management Project (ie Logging and Roadbuilding) within the Eel River Late Successional Reserve on the Mad River Ranger District of Six Rivers National Forest. These are critical watershed areas which will be adversely impacted by this proposal. It will more than likely further degrade the already-impaired Mad and Van Duzen River watersheds, and degrade or destroy habitat for one of the area's few remaining reproductive northern spotted owl pairs. This is a destructive plan and I hope that you will reject this plan.
