Title:
Comments: I am closely involved with enhancing and protecting the salmon and trout populations up here in Alaska. I have been to Idaho- you have a beautiful state. Please, DO NOT ALLOW this proposed mine project. Perpetua Resources' proposed project would destroy over 20% of critical habitat for chinook and bull trout in the project area.

Over 70% of the project disturbance would occur on public land. The Stibnite Gold Project puts the Salmon River at risk, one of our most cherished and economically important river systems. It threatens the recreation industry and some of our most iconic fish species.

It would be a mistake to allow it. Please do what you know is right. We selfish humans can find other alternative places to find more metal resources...or better yet, we can use INNOVATIVE, new technologies instead of mine into the earth!
