Title:

Comments: Please consider the vital importance of saving as much of the wild as possible -- instead of desecrating it and destroying it forever, to the great loss on MANY levels to ALL of us, to the planet, to the animals, ecology, environmental needs of all of it, and to humanity! Once destroyed, there's no getting it back! Please use your authority to PRESERVE it -- that's the purpose of such places and of the people who safeguard it.

Thank you.
