Title:

Comments: I strongly object to the usfs preliminary approval of the stibnite mine. I don't believe due diligence was observed by the mining company or the usfs. We the tax payers will be left footing the bill for clean up and it is extremely likely contamination of the Salmon River basin will occur and our children will have to deal with that environmental catastrophe. I trust the usfs will do the right thing and reevaluate the stibnite mining venture.

Respectfully John.
