Comments: I urge the Forest Service to adopt an alternative that lets the Mount Timpanogos Wilderness be wild by allowing the metal Quonset hut to fade with time, or to use wilderness-compatible means (such as non-motorized/non-mechanized tools) to remove the hut's remnants.

It is vital for the Forest Service to protect the essential wilderness characteristics of the Mount Timpanogos Wilderness. The Quonset hut is not needed for managing this Wilderness. This structure is not part of the wilderness character of the area and therefore there is no need to repair it.

In addition, if any repair were carried out then any use of helicopters to repair or rebuild this or any structure is antithetical to Wilderness, and should be conducted using pack in and pack out methods.
