Title:

Comments: Lands designated as Wilderness are not allowed to have motorized vehicles, so rebuilding or removing a structure with helicopters is not allowed. This structure should not be rebuilt because it does not add to the Wilderness character of the land. In fact, it should be removed by non-motorized means. It would also be acceptable and within the rules established for designated Wilderness to allow the structure to decay on its own with natural processes.

Please adhere to the Wilderness designation guidelines in this situation. Thank you for considering my comment.
