Title:

Comments: Please please god no. Please support Alt 3 and stop the logging of old growth forests. I know in reality this plea will most likely go ignored, as most of all decisions in this country are made solely on the basis of profit, and never to preserve the already fragile and dwindling ecosystem we already have a rely on. But I beg you, preserve what little of our old growth forests remain. They are diverse, important ecosystems that deserve our protection. The sporadic, usually monoculture "new growth" forests that are designed to take their place are often ecologically sparse and not healthy ecosystems. Save the old growth forests, please, so my kids and their kids can someday see them too.
