Comments: Dear US Forest Service,

Please protect the Old Growth Forests of Indiana. They are vital to our animal and plant habitat as well as to our spiritual well being. In these troubled political times, we need all of the solace and spiritual nourishment possible. Walking among the old growth trees is a way to help us all as well as preserve habitat for the foxes, box turtles, birds who rely on the natural vegetation and our own sense of spirit and purpose, Please save our old growth forests.

Thank you.
