First name: Richard

Last name: Owens

Organization: Hoosier Pawpaw

Title: Forest Farmer/owner

Comments: My name is Richard Owens, I live near the Hoosier National Forest and I grow and sell woodland botanicals.

You should hear the trees leaning together to tell Internet jokes. The joke is on us!

This isn't rainbows and unicorns, we're not do-gooders, we're humans that understand that without trees, the humans have no future here.

What will it take for the Forest Service to stop their destruction in the public forests of Indiana and ALL US Forests? Is it money? I wish it was just money. We would help you raise the money.

Is it the need to control your little sensory bubble at the Forest Service, just because that's the way things have always been done?

My sensory bubble is global. When people in other parts of the world die or are in pain, because of climate change that we've contributed to, it hurts me too.

Stop contributing to the killing!
