Comments: I support alt 3 of the Old Growth Amendment -- the full protection and stewardship of old growth forests, for the very reasons laid out on the first page of the amendment document on your own website. Short-term profits from logging companies do you replace nor make up for the loss of one of North America's most valuable natural wonders. It takes millenia for old-growth forests to recover from logging, and allowing logging companies to eat away at old growth forests with carve-out exceptions will mean old growth forests will continue to diminish year-after-year.
