Comments: Greetings: my comment today is regarding the Emerald Lake Shelter Reconstruction Project #66370

1. The Forest Service's primary responsibility should be to protect the wild character of the Mount Timpanogos Wilderness. Thus, any human made structures should be deemed unnecessary unless they are essential for maintaining wilderness. Therefore, reconstruction of the quonset hut is not essential. Furthermore, the presence of this human made structure is not in line with the definition of wilderness.

2. If the quonset hut is to be restored/rebuilt this must be accomplished with non-motorized means.
