Title:

Comments: The Forest Service should adopt a much-strengthened version of Alternative 3, with modifications.

As a 6th generation Oregonian, my family has enjoyed the benefits that mature and old growth forests provide to our well being, be it in the form of recreation, clean air and water, and habitat for forest dwellers.

There is smoke covering much of Oregon today as our precious forest burn. It has never been more critical to protect the nation's last remaining mature forests. Please end logging here now.
