Title:

Comments: Without forests to filter drinking water, millions of people could lose a clean source of water. And without mature and old growth forests to absorb carbon, climate change could be worse. We need these forests and trees if we are going to have a sustainable future on this planet.

I call on YOU to protect mature and old-growth trees and forests on federal public lands from logging, and to give these old-growth forests that have been lost, time to regrow.

PERMANENT PROTECTION via AMENDMENT[hellip]. and STOP CLEAR-CUT LOGGING.

I want the U.S. Forestry Service to incorporate better STEWARDSHIP: improved techniques AND those proven successful by our native peoples for thousands of years.
