Title:

Comments: Stop logging old growth trees entirely. All of them. Forest stands, trees, no cutting them down to only 8 OG trees per acre. Just leave all these old trees alone. God knows Americans love marveling at enormous redwoods and trees so big you could drive a car through them. None of that will be possible anymore if you don't ACTUALLY commit to the words you pretend to stand by in the public eye, and ACTUALLY stop logging all old growth trees.
