Last name: MacArthur

Organization:

Title:

Comments: The 300 mile circle of Plumas and adjacent counties reveals 1.5 million acres of burned timber none of which has been restored, and presents an even greater fire danger, inevitable soil erosion to clog our streams, lakes and reservoirs, and destruction of wildlife and habitat.

This is NOT a result of "climate change" but the result of 40 year USFS MISMANAGEMENT of the lands.

The Old Growth proposal supported by Chief Randy Moore and the agency will permit continued failure in actions and trust.

Implement an aggressive Forest Service Initial Fire Attack.

"First Put Out the Fire!"
