Comments: I have heard stories of the mentioned shelter saving many lives over the years that would have been tragic losses of life and just because some folks don't think ahead doesn't mean we should let them die. Due to health matters I'm not able to hike that high , or much at all, but if anyone needs an emergency shelter, and this particular area can change in minutes in weather, I would like to know that they have or had a fighting chance so I say fix it and or rebuild it, Please and Thanks in advance.
