Comments: Hello,

I have read through The Old Growth Amendment DEIS and consulted with people in my life who are in environmental fields and I want to express my support and desire for the "More Restrictive (Alt 3)" option, and any option that will restrict commercial timber harvest of old growth. Without restricting commercial sale it cannot functionally protect old growth. Please close the loopholes in this plan that will inevitably be exploited for profit and include STRONG protections for mature forests that will not remove any from Old Growth status - we need these forests, the climate needs them, our future children deserve them.

I am just a citizen but I know how important these forests are, thank you for your time.
