Title:

Comments: Dear Forest Service,

Please close the Emerald Lake Shelter Reconstruction Project #66370 and let this Mount Timpanogos Wilderness be wilderness. No shelter is needed and certainly not the invasive intrusion of work crews, machines, helicopters, trucks and whatever else would be used to restore this already invasive shelter. This shelter has no business in the wilderness. Just let it decay and return eventually to Mother Earth.

Please keep out of this wilderness area and let it be true wilderness. Mother Earth and all of her creatures will be forever grateful as will I. Best Wishes, Terry Tucker
