Comments: I am in favor of more restrictive protections for our dwindling old growth forests. Not just old trees, but the forests, their soil communities, their hydrology, their wildlife. I fully support the "More Restrictive" Alt #3 from The Old Growth Amendment DEIS. We cannot live in nor accept a world without biodiversity and it must be protected from moneyed interests that, at their current pace of destruction, will never be satiated, even when there's nothing left. Please put these specific protections in place.
