First name: Claudia

Last name: Nix

Organization:

Title:

Comments: I believe that old growth forests are very important for our culture, the people, the country, the environment and the economy. I believe it is our duty to protect these areas because they will also protect us. These large trees help to clean the air. I believe that the Forest Service has a responsibility to protect these areas and not allow for them to be damaged.

Please take all the precautions you can to protect these areas. Close the loopholes that exists in the present plan.

Please take care of these special places for future generations to come .

Thank you,

Claudia
