Comments: The Emerald Lake Shelter Reconstruction Project is a proposal that claims it would improve the wilderness character of Mt. Timpanogos Wilderness in Utah. Not so...the FS proposes to use helicopters & other motorized equipment to reconstruct a sheet metal Quonset hut in this wilderness. It does not need to be redone with equipment & men disturbing the wilderness, wild animals, & the environment. Let the hut fade with time. Allow this area to be undisturbed. Mother Nature should prevail. The FS must adopt an alternative to allow the wilderness to take its natural course. Thank you.
