Title:

Comments: You know what I appreciate the he k out of the Forrest Service and I worked building trails for the Washi gton Tra7ls Association for awhile (and I got a green hardhat with my name on it. I love the forests of th Pacific Northwest and I want them protected as a buffer to cli.ate change also. After working for "Ben's Truck Stop" in Blaine for a while (a couple of months) I realized these guys are n ot fooling around. A pump read \$700 a d 166 gallons of diesel after a trucker was done with it. Also I saw 'dry lightening" after coming home from a camping trip. That sc ared me a bit. The was t en ough rain to wet the pavement for miles. Climate chan ge is happening an d it's scary! Let's pass this legislation / land management plan now!
