Title:

Comments: Our poor, poor planet is much too close to her tipping point for us to be enacting policies that will only serve to push her over the edge. We must preserve whatever precious little pristine wilderness remaining and re-wild much of that stolen from the animal nations. We are in the midst of the Sixth Mass Extinction. Since we've put a man on the moon the human population has more than doubled while that of the wild animal nations has more than halved. The survivors need full protection and deserve to live and raise their families in peace. In that spirit, I am in full support of federal purchase of the 80,000 acres of state school trust lands inside the BWCAW, and the 3,200 acres of St. Louis County land included in the land purchase package and their protection from being developed.
