Comments: Hello,

This plan for the Stibnite Gold project has been thoroughly reviewed and revised over the years, and I'm glad you reached this decision of approval. The lengthy process has been a testament to a thorough job done by the Forest Service and Perpetua Resources, among many others.

I believe the process has worked and the approved plan represents a delicate but successful balance between the concerns of the environment, the engine of industry, and the needs of the defense community.

I thank you for your diligence over the years and I hope that the final approval happens without any delay. It is not easy to make these decisions and I don't envy your role. Thank you again.
