Comments: Subject: Protect Old-Growth Forests with Critical Improvements Needed

I am strongly supporting the proposed amendments to national forest management plans to protect and enhance old-growth forests in alignment with President Biden's Executive Order 14072.

However, I urge you to strengthen the proposal with the following critical improvements:

1. Prevent Degradation of Existing Old-Growth Forests.
2. Recognize the Value of Passive Stewardship - allowing Nature to manage the forest.
3. Establish Clear, enforceable Standards for Stewardship:

Thank you for your efforts to protect our invaluable old-growth forests.

Sincerely, Karen Guzak
