Comments: To Whom It May Concern,

(I hope that is all of us!)

We need our trees to sustain and support our population now and in the future! Trees give off oxygen, absorb water, make the earth cooler, and sustain wildlife. We are seeing the destruction of woods and forests have the opposite effects: increased heat which is linked to increase crime, flooding and reduced wildlife. Won't you support our trees, especially our mature growth, to become old growth. We need a vote for all that trees support for us.

Thank you for considering,

Tara-Lynne Sinicki
