Comments: Hello and thank you for the 27 minute project video. That was very helpful. I am not opposed to the sale of these lands as the funds will benefit our schools here in Minnesota. That being said, I am only for this sale if the future management of these lands remains geared toward conservation. It is my hope that they will be managed and maintained in their natural state, and continue to be available for public recreational and educational use, as long as the impact of that use is minimal. Let's maintain our forests and our natural areas!
Thank you.
