Comments: I strongly oppose the Stibnite Mine Project due to its potential to cause irreparable harm to the East Fork South Fork Salmon River and its delicate ecosystems. As an avid rafter and fisherperson, I deeply value Idaho's pristine natural beauty, which is integral to our state's identity and well-being. This project poses a significant risk to these cherished habitats, threatening both the wildlife they support and the recreational experiences that countless individuals, like myself, cherish. While the mine may benefit a select few, the long-term environmental damage and loss of our natural heritage will adversely affect many more. Preserving Idaho's outdoors is essential for maintaining the health of our environment and the quality of life for all its residents.
