Comments: Hello,

I am writing in support of The Lands Council and REI Cooperative Action Network to protect old growth forests in our national forests. Please ensure clear guidelines are retain and increase old growth distribution and abundance. Please use of passive management in existing old growth areas that don't require active intervention, particularly in the coastal Pacific Northwest and East Coast. And please, push for directives that prevent degradation and ensure long-term ecological benefits. Our world and earth are better with forests intact and climate action to be taken seriously.
