Comments: Old-Growth Forest Conditions Across the National Forest System #65356 does not protect our national forests. This proposal contains various loopholes to "proactively manage the stewardship" of these public lands which would open them to logging. Many of these forests are irreplaceable sites with old growth stands that will be irreparably damaged by logging. These are public lands were set aside and preserved to sustain the environment, plant species and wildlife they contain, not to be economically exploited for the benefit of companies and their shareholders.
