Title:

Comments: I support action alternative 2 developed by the US forest service draft DEIS . I also enjoy old growth Forest but diversity must be part of the plan to have healthy forest habitat. I am a hunter and as any hunter or wildlife lovers know there is more wildlife in young growth than in old growth forest. When professional, Forsters, and wildlife experts are telling people what needs done for wildlife,fish , quality water , and health of a forest needs done I do not understand all the options

Of people that are not professionals Foresters. All these court battles preventing our educated professionals from doing their jobs keeping our forest healthy and wildlife thriving should be stopped. The experts knows what needs done. Let them do their jobs for the benefit of all wildlife that can not speak for themselves.
