First name: Judy

Last name: Finger

Organization:

Title:

Comments: I am urging the Forest Service to include protections for mature forests, eliminate unnecessary logging exceptions for old-growth forests and strengthen overall protections of our National Forests.

Industry and commercial entities will always want more resources and fewer protections. Our natural resources and environment are not limitless and deserve strong protection by the federal government.

Please consider strengthening this proposal to more closely align with the recommendations of the environmental groups who are our eyes and ears in cases like this.

Sincerely,

Judy Finger
