Title:

Comments: The US Forest Service needs to leave what remains of our old growth forests standing! These forests are critical for the health of wildlife, water, people and the planet. These forests belong to the people and we need them for our future and that of our children and generations to come! Please do not allow the forests, including the White River Forest, Uncompahgre and Gunnison National Forests and the Grand Mesa, to be destroyed for the greed of a few. We will lose so much that is needed for all of us to survive on this planet. Remember, the forests belong to all of us! I dearly hope that you will do the responsible thing and leave us our forests and our future. Thank you, Julie and Stephen Richards
