Title:
Comments: Stop cutting old-growth in Daniel Boone National Forest.

Forward thinking of forest management to insure old-growth for future generations.

Eliminate profit driven excepts to convert old-growth to young forests.

Keep inventory of old-growth forests in a database accessible to the public.

Develop a network of future old growth forests.

The benefits of old-growth forests are continuing to be understood, with many more sure to be identified. Once the old-growth trees are cutdown these benefits are lost for many generations to come.

Old-growth forests provide a sense of wonder and appreciation for Nature's gifts.
