Comments: n regards to the effort for the Land Management Plan for Old Growth Forest Conditions Across the National Forest System #65356, I would support any effort that creates a healthy forest habitat for Ruffed Grouse, American woodcock and other wildlife. I hope this project will create, enhance and protect early successional forest habitat. Early successional forest habitat also benefits other species such as deer, turkeys and over forty species of songbirds that need early successional forest for survival.

Thank you for this opportunity to respond.
