Title:

Comments: i want to preserve as much of our USA's old growth forests as possible. Trees are crucial to maintaining living ecological communities for wild life, for our people to enjoy, as they are for helping to clean our air. I do not want to see any more of our environment decimated irresponsibly for building when other materials can & should be used. Trees should not be used for paper making, charcoal, or any other products that should be made by tree farms or other methods. Please Preserve our nations natural forests, & trees.
