Comments: Dear US Forest Service,

I believe that preservation of Old Growth Forests is extremely important to the citizens of our country and the world. They are important for aesthetic and well as climatic reasons. Old growth forest help provide oxygen, remove carbon dioxide, protect watersheds and provide valuable habitat.

Old growth forests are beautiful places to visit and provide an escape from urban life for people everywhere.

For these reasons I am asking the US Forest Service to continue to protect our Old Growth Forests from being logged or destroyed in any other fashion.

Thanks for your time.

Allen Loyd
