Comments: Old growth forests are irreplaceable over generations. We cannot restore what is lost by logging old growth any more.....the carbon sequestering, the cooling of the planet , the diversity of the habitat, the protection of the waters that flow through old growth is precious. I feel people who make these decisions don't walk through an old growth forest then visit the clear cut adjacent to it. It is awful. These are our forests, not yours to sell without massive public input and awareness. Clearcutting old growth needs to stop. Stop now. NO more. Please. For the sake of all living creatures here and in the future.

STOP CLEARCUTTING OLD GROWTH>... JUST STOP!
