Comments: Greeting,

I write today to urge you to stop cutting OLD GROWTH FOREST!!!

They will not grow back in my life time or even in my grandchildren's lifetime. With the climate crisis and the warming of the planet they may never grow back.

ENOUGH IS ENOUGH!

The remaining forests are essential to stave off the climate crisis by sequestering carbon.

Saving what little remains is very, very important to me and my family.

Thank you,

Geri Baxter,

Oregon
