Comments: Hello.Friend asked me to write letter to forest service because she knows that ancient forest always ment to me so much(since I moved to this country many years ago,actually even before I moved here),it is all true. But unlike my friends and millions other citizens I no longer believe that anything in this matter can be done.Pettition of millions mean nothing,it is just a smoke and mirror game you are playing. The system is corrupt to the bottom.You will pretend that you care for the jobs,schools and so on.Your jobs,benefits, promotion depend on taking those trees out.If not ,politicians, lumber barons will make you feel the pain.You know how it all goes.

Tell you something,I often have visitors from Europe in my home.I take them to wild places,ancient forest,other places.You know what all they say at the end of visit?That the old forests are the only reasons to visit USA,besides it is a third world country,homeless,poverity,crime, state of health care system ,education ,craker box like houses and apartments and more like that.But of course the is always plenty of money to make wars all over the planet.

Ninety plus percent of old forests are gone,that few percent that is left is suppose to save that primitive industry, jobs,schools.No it will just make few people richer and rest of humanity poorer.

You could call the area of ancient forest Area 52,like it would not exist. Do you think that the country would fall apart because of that?

Well,I think that you will destroy it all.Prove me wrong.Sincerely ,adam uminski
