Comments: Hello,

I am writing you to please support "Alternative 3" for the old-growth forest plan. I would like that alternative to even close some of the loopholes that allow logging.

I want a plan to end all logging, thinning, and burning on national forest lands. Any logging, including non-commercial is still logging. Logging has been shown to increase fire danger.

Your current preferred Alternative 2 would lower protections for some forests, like the Nex Perce. I do not support it and ask you do the same.

I want a plan that does not allow logging or thinning in any way of old-growth forests. I want a plan that works harder to enable old-growth forests to regrow.

National forests need to get out of the business of logging. We need to plan for the long-term gains of the many, versus the short financial gains of a few.

Thank you for your time,

Bret
