Comments: To USFS management plan #65356 team,

Mature and old-growth trees and forests protect our climate by absorbing and storing carbon, boost resilience to fire, help regulate temperatures, filter drinking water and shelter wildlife. Logging these trees deprives us of the benefits and beauty of our largest, oldest trees.

We can't afford to lose any more ground to degenerative and unsustainable forestry practices.

Please draft an amendment that will not only prevent any more cutting of old growth stands, but will actually generate future old growth forests.

Thank you for your careful consideration in planning for our collective future.

Sincerely,

RC - Ashland, OR
