First name: JACK

Last name: GAHAN

Organization:

Title:

Comments: Hello, my name is jakahan and I've never ever commented on something like this before but this is so important. I live in Oregon and I have seen climate change firsthand. I also know that I'm lucky to live here because of what we have around us in forests wetlands and rivers. I've also watched wildfires the river drop down the forest vanish and huge strips of bearland showing everywhere I look and then the new growth burn because it is not designed for our climate or buyer dangers. I asked that you protect all old growth for us everywhere in the country. It is important we're going to need these oases as the rest of the world dries up burns up and turns into desert. Please help us protect our world, our children, our future, and our planet. If you have any questions, please feel free to reach out. I've gone ahead and included all my information. I'm a bank manager very conservative but this is so important and I don't think everybody gets it
