Comments: Thank you for all the work you do to save our beautiful forests. Old growth forests are important for our native animas, for cleaner drinking water and for their shear beauty and history they must be preserved for future generations. I can not stress enough how the beauty of the forests and mountains surrounding WNC mean to me. Please do not let them be destroyed for short term gain(logging, etc) hundreds of years from now North Carolinains will look back and thank us for preserving an irreplaceable part of our natural environment.
